# Fishery visit

On 26th May 2016, Year 4 walked from school to the Whinwhistle and Woodington Fishery to learn about how the river and Fishery are managed. We had an informative tour around by local fishermen Dennis and

Pat. We learnt all about the many different types of fish, identified lots of plants and discovered how the floodplain at the Fishery protects Wellow village. We found out how a fishing rod works and were lucky enough to see a fish be caught. We are really grateful to the local Fishery for an interesting and enjoyable visit and hope to be back again next year!
