Year 4 Southampton Docks  
and Old Town visit

September 27th 2016

What a drizzly old day it was after so many weeks of beautiful sunshine but nothing dampened our spirits as we drove into the city. First was a tour of the Old Town, where the children could sketch the different shapes of buildings and look at the juxtaposition between old and new architecture.

West Quay was a hive of activity as we stood on the Old Town walls and gazed at the new building works on West Quay 3. In the afternoon we boarded the Blue Funnel Ferry and spent a very pleasant hour in the sunshine learning all about the docks and port from the Pilot of our ship. The Britannia cruise ship was in and towered above us so we could even count the cabins and wave to the people sunbathing on the terrace .
