

Year 2 Growing Project

Look at how our beans and caterpillars have grown. Over the weekend the caterpillars have started to climb the pot and turn into a chrysalis. The broad bean and French bean seeds we planted have grown so much (you can see them in the yellow tray). We think the pots with no seedlings must be the French beans and we are hoping to see some shoots soon. The broad bean plants are growing taller and taller. Our experiment seeds have not started to grow yet. We think they might germinate by the end of the week. Keep an eye out for us.
