

Year 1 Testwood Lakes

18.5.17

Wellow
Primary School

Year 1 visited Testwood Lakes to learn about animals and their habitats.

We did pond dipping to find out who lives in a pond—we caught tadpoles and all sorts of other creatures. We had to be very well behaved and careful around the water. Grace our teacher was very impressed with how well we listened.

We handled different skulls and looked at teeth to discover which animals eat grass or rip meat. We know about carnivores and herbivores - ask us!

When we went into the woods we hunted for minibeasts to classify,

We were very brave and all held a wriggly worm!
